

IT STAFFING SOLUTIONS

DO YOU HAVE THESE CHALLENGES?

- Identifying and retaining top IT talent
- Resource availability with the right level of skills to deliver IT projects on time and under budget
- Internal resources not having the right blend of skills to meet IT objectives

THE BENEFITS OF IT STAFFING SOLUTIONS

You can meet these challenges by partnering with Corporate Technologies to provide the IT project staff you require on either a short- or long-term basis. The benefits of our IT Staffing Solutions are significant. They:

- Deliver the technical skill set you require
- Dramatically reduce your recruiting time
- Significantly increase your ability to meet IT objectives
- Deliver even complex IT projects within acceptable timeframes and budgets
- Save substantial money by allocating resources only when and where you need them
- Reduce your on-the-job training costs to virtually zero
- Provide just-in-time coverage, if you lose a highly skilled resource

OUR APPROACH TO IT STAFFING SOLUTIONS

Corporate Technologies IT Staffing Solutions leverage two unique capabilities to deliver best-talent IT project staff to customers and partners:

- **A “virtual bench” of repeat performers** You will access highly qualified, high-performance, independent IT consultants that we have worked with many times before—and that have the technical skills, project delivery, and work ethic you require.
- **Involvement of Corporate Technologies senior engineers** One of our full-time subject-matter experts will interact with you to personally create your technical staffing specification, screen appropriate candidates, and recommend only the best-fit finalists.

All you have to do is approve the spec and interview the final candidates—we do the rest.

CUSTOMER RESULTS

- *“My personal involvement in recruiting technical IT staff went from approximately half my time to just a few hours, once I started using IT Staffing Solutions.”*

THE BREADTH OF OUR VIRTUAL BENCH CAPABILITIES

We focus our virtual bench capabilities on disciplines, solutions, and capabilities that we already know very well. The **architects**, **design** and **development engineers**, **project managers**, and **DBAs** we provide have an in-depth knowledge of the following solutions:

SOLUTIONS	CAPABILITIES	
Business Intelligence	Dashboards Data Quality Data Warehousing	Report Writing ETL
Data Storage and Management	Backup Management SAN/NAS	Data Migration
Systems	Virtualization Windows/Linux/Solaris/AIX Data Center Migration	Cluster Configuration and Management
Security and Networking	LAN/WAN Management WAN Optimization	Load Balancing Firewall/IDP Management
Database Optimization and Integration	DBA Support DB Migrations	DB Upgrades DB Tuning

THE DEPTH OF OUR VIRTUAL BENCH CAPABILITIES

Our virtual bench capabilities include individuals with the depth of technical knowledge and expertise that enables them immediately to be productive members of your IT project team:

- Architecture Level
- Design Engineer Level
- Development Engineer Level
- Specialists: System Admins, DBAs, etc.
- Project Management

CUSTOMER RESULTS

- *“Corporate Technologies met—and exceeded—my expectations for delivering the demanding technical skill set our project required.”*

OUR IT AND IT STAFFING EXPERTISE

Corporate Technologies is staffed with full-time solutions architects, systems engineers, and lead consultants with many years of IT presales and production environment experience.

We complement our technical competency with our IT Staffing Solutions management team, which has 20 years of industry experience and a track record of building a \$20 million staffing business. This team comes with the industry-leading sourcing and candidate management software, which optimizes best-match fits of virtual bench candidates to each client's IT resource needs.

ABOUT CORPORATE TECHNOLOGIES, INC.

Founded in 1994, Corporate Technologies, Inc. has earned a reputation as a leading enterprise systems integrator. We architect, implement and manage production quality enterprise computing solutions. We provide our clients with enterprise systems engineering expertise in strategic application development, infrastructure solutions, and systems management.

CUSTOMER RESULTS

- *“Corporate Technologies took ownership of my staffing problem—from determining the right technical spec and delivering a small number of highly qualified candidates—through to the successful delivery of the skill set we needed.”*
